Note: 5:Almost Always Effective; 4:Usually Effective; 3:Sometimes Effective; 2:Rarely Effective; 1:Never Effective;

Instructor Related Questions: Vishal Chawla (17 comments)

Q: What were the strengths of this course and/or this instructor?

1　The strengths of this course I will say is the materials provided for students to go and learn and also projects to embark on

2　-

3　the assignments given every week was helpful to keep a track and have a continuous learning process.

4　Very knowledgeable professor. He really cared to make the students fit for a future role in the corporate world.

5　N/A

6　This course helped me in developing a website end to end. I learned frontend and backend through this course.

Q: What could the instructor do to make this course better?

1　These are ;
1. Lecturer should be passionate about teaching. Most times he comes and seems is in a rush to finish topics and leave.

2. Do more work in building a relationship with his students to know individual strengths and weaknesses this will provide an insight to where he can channel more energy to.

3. Overload of assignments and quizzes, I think he can find a way of grading students better. More assignments do not mean students understand what they are doing. Had most of my colleagues complaining of how he is not considerate as he pours so much materials to go and read at the same time finish assignments and takes quizzes in that same week. Therefore students are in a rush to finish or use tools like chatgpt to get it done.

4. Choose TA's who are not only intelligent but also considerate with the aim of helping students not trying to pin down students. Observed TA's found joy to find little mistakes to give low grades and pick exam questions not from materials provided and intentionally bring tough questions and be laughing whilst students are struggling to write. Also too much freedom given to TA's as they can change their TA hours at anytime.

Also, LAB Session are not that helpful. As TA's are usually in a rush and are not audible. You will notice only about 5 people are about to follow and Mostly they get stuck on the way and time goes then that will be it for the day.

Overall these are my concerns.

2　-

3　Final project, work could have been split across as multiple assignments so we could spend time working and learning new tech stack and implementing it.

4　Nothing. He was great.

5　The course is structured in such a way that you do all the work - attending the class/lab sessions weren't very helpful. If that changes, it would be a great class!

6　If he could have given more insights on mern stack, it could be better.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

1 Already pointed out.

2 -

3 Overall very good, more hands on Lab

4 Prof. Chawla went above and beyond to make his students learn everything needed to grab a co-op/job opportunity in the near future. Not only did he take up some of the most relevant tech skills required to be job ready, he recorded optional lectures that we could take up if and when we had time to learn additional skills. He was amazing.

5 Instructor explained all the concepts very well and the mode mode of teaching is very good.

Questions to Assess Students' Online Experience (5 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

1 There was no online presence, only in-person.

2 NA

3 The course was in-person.

4 N/A

5 The instructor has explained in detail about the angular js concepts in the videos.

Student Self-Assessment of their Effort to Achieve Course Outcomes (6 comments)

Q: What I could have done to make this course better for myself.

1 Chosen another course, this course was too demanding, always packed with assignments and quizzes no time to actually understand what is being taught.

2 -

3 More work on the projects and assignments.

4 Nothing. This was a great class.

5 N/A

6 If i learned more about javascript prior to this course, it could have been better.
